

## Meqanic, the unique physics-based puzzle app, is now Universal for iOS

(07/11/2014) Beltsville, MD - Tareso announces today the release of Meqanic™ 1.1, which brings major new improvements to the radically different and incredibly difficult puzzle game that matches you against the Universe.

Meqanic is now a universal app for iOS, with support for all iOS devices supporting iOS 7.0 and above. Previously iPad-only, Meqanic now brings its take on puzzle play into your pocket with support for the iPhone.

FREE for a limited time and available now on the Apple App Store, Meqanic is a cerebral game that is based on real physics.

Meqanic is all about placing blocks in the right order to make a match. Each block has intricate rules, which depend on what other blocks are nearby. The results are complex and increasingly intricate visualizations which will guide you to recreating the target pattern. To master each level, you will need to build intuition as you go. Beating the entire collection of levels will be almost impossible.

Meqanic 1.0 brought a new type of puzzle game to the world. Unlike other physics-based games, Meqanic is based on the crazy rules that govern the Universe at the smallest level. Meqanic 1.1 adds features to make game-play more intuitive.

"Our goal is to explore the interaction of science and society through creative new projects," says Erica Johnston, press contact for Tareso, LLC. "Meqanic is the beautiful result and it's really pretty cool, especially since it's based on real science. It might seem easy at first, but it gets complicated fast. I love that I can play it on my iPhone now."

Meqanic is more than just a challenging game; it is imbued with infinite complexity and meaning.

Meqanic 1.1 brings new features such as:

- Meqanic is now a universal app, play it on the iPhone, iPod Touch, or iPad.
- All new block images: flatter, cooler, more in-line with the design of the Meqanic app.

- We've added shading and some 3D perspective to the toolbox and image match frames so it is clearer that the block toolbox scrolls.
- We've added a new scroll animation on each level start that scrolls through all the blocks in the given level, so it's clearer what blocks are available to you for each level.
- The iPhone/iPod Touch interface has been tuned for the smaller screen.
- Meqanic shows your combined Game Center rank on the home screen, but doesn't bug you otherwise.
- Loads of bugs fixed and possibly some added. :)

The game includes:

- (1)– 280 CORE puzzle levels from easy to mind-bending to impossible
- (2)– Leaderboards and Achievements – challenge your friends
- (3)– An EXPLORE mode to practice and explore
- (4)– Additional level collections and a FOREVER PASS for purchase
- (5)– A How to Play guide
